WORK EXPERIENCE

Honeycombers Pte. Ltd. | Singapore | *IT Manager (08/2022 - 06/2025); IT Executive (08/2018 - 07/2022)*

- Managed the development, testing and maintenance of the themes, new sections and features, plugins and APIs for Honeycombers' high-traffic WordPress Multisite (Singapore, Bali, Hong Kong) and HoneyKids Asia, which garnered a record 3 million combined monthly page views during the COVID-19 period, with proficiency in the surrounding LEMP stack (Linux, Nginx, MySQL and PHP)
- Executed the best security practices to prevent cyberattacks and ensure the websites are always online, and that the company is adhering to the Personal Data Protection Act (PDPA) concerning the collection, use, disclosure and care of our readers' personal data
- Provided in-house technical assistance, including software subscriptions management, Zoom webinars hosting, podcast producing, management of company files and email accounts, hardware & IT supplies inventory and procurement, and IT onboarding/offboarding

Accela Pte. Ltd. | Singapore | *IT Executive (08/2015 - 07/2018)*

- Managed 25+ end-to-end web development projects across multiple CMS platforms, from client briefing and scope definition to deployment and post-launch support
- Translated creative wireframes and mockups into fully functional, responsive websites, ensuring cross-browser compatibility and adherence to SEO best practices
- Recommended and implemented relevant plugins to enhance functionality, security, and performance
- Provided IT onboarding and helpdesk-style support for internal team members and 100+ co-working space members
- Managed internal IT systems, including Box, Basecamp, and Microsoft 365; oversaw procurement of tech equipment

KP&PR&EMS Inc. | Taguig, Philippines | *Programmer (01/2012 - 05/2015)*

- Coded and maintained websites using PHP/MySQL
- Designed and presented event layout concepts using Photoshop and SketchUp, translating client requirements into mockups
- Performed office and events-related works using Word, Excel & PowerPoint
- Served as on-site event staff for 30+ events, supporting setup, coordination, and live operations

OpenAxcss IT Management Solutions | Manila, Philippines | *Web Designer (03/2011 - 09/2011)*

- Designed 30+ website pages in Photoshop, aligning visual layouts closely with client requirements and brand guidelines
- Managed domain registration and coordinated website hosting setup to ensure smooth deployment
- Developed web pages based on approved designs, with thorough content proofreading and implementing necessary content and code refinements

Allsec Technologies Manila Inc. | Taguig, Philippines | *PHP/MySQL Developer (09/2009 - 11/2010)*

- Continued the development of the company's system, ensuring compliance with standards and conventions in developing programs
- Prepared and modified MySQL databases as required, and provided database and code optimisation recommendations
- Ensured 99.99% uptime for job and transfer queues, and supported with server monitoring

PROJECT EXPERIENCE

Blog App - Vercel

MEVN Blog Platform

Role: Full-stack Developer

Tech Stack: MongoDB, Express.js, Node.js, Vue.js, JavaScript, Bootstrap, APIs, GitHub, Vercel, Render

- Implemented full CRUD functionality for blog posts, ensuring only authors can update/delete their own posts while admins maintain moderation control.
- Built a comment system with user references, input validation, and admin moderation for content control.
- Enforced authentication and authorisation, restricting access to posts and operations based on user roles.
- Implemented input validation and error handling, returning meaningful HTTP status codes and ensuring data consistency.

E-Commerce Platform - Vercel

MEVN E-Commerce Platform

Role: Full-stack Developer

Tech Stack: MongoDB, Express.js, Node.js, Vue.js, JavaScript, Bootstrap, APIs, AWS, GitHub, Vercel

- Built a MEVN e-commerce platform with a dynamic product catalogue, real-time cart updates, and a responsive frontend.
- Developed an admin dashboard with user management and real-time analytics to streamline operations.

Airline Booking System Prototype - Vercel

MEVN Airline Booking Platform

Role: Full-stack Developer

Tech Stack: MongoDB, Express.js, Node.js, Vue.js, JavaScript, Bootstrap, APIs, GitHub, Vercel, Render

- Interactive prototype simulating end-to-end airline booking functionalities, including flight search, reservation, payment processing, and real-time ticket management.
- Project currently in active development, transitioning from prototype to a fully interactive airline booking system with scalable backend architecture.
